

Memo

To:	SCOC Residents, Families and Staff
From:	Mary Hoare CEO
Date:	May 30, 2020
Subject:	COVID-19 Update

All of our Resident swabs have now been processed and I want to confirm that as of today May 30, 2020, we have **3 active cases of COVID-19** throughout independent living, Long Term Care continues to remain COVID free.

All staff who work in the independent living apartments were also tested and they too are negative.

Our 3 positive Residents are currently quarantined in their apartments and are in good health and relatively symptom free. Their 14-day infectious period ends on June 4th and Toronto Public Health will determine next steps.

It is fair to say that COVID-19 continues to rage all around us and if we intend to keep it out of our community we must be aware and diligent at all times, we cannot let our guard down and become complacent as this virus is not just going to go away one day it is here to stay and we as a community must adapt.

By now everyone is aware that strict precautions continue to be in place to protect our community and we truly understand that some of them are very frustrating to observe on a prolonged basis so my message to you today is one of support and encouragement.

We all must support and care for each other and understand that it will take all of us to beat this virus. We must pull together to do the right things and make the right decisions as every decision we make or action we take as an individual impacts our entire community.

We are a community of love and support and now is the time to show each other what that looks like. We must be kind and supportive and let one another know that they are not alone in these challenging times and that there is a whole community behind them after all it takes a village. Please reach out to your neighbour and ask them how they are doing and if there is anything they need. This kind of love and caring is infectious and is the only way we are going to survive.

Please know that your Leadership Team is there for you too and that there is nothing we won't do or try to keep you safe.

Blessings

Mary Hoare

CEO
